360 of Anything

Attain a single source of truth, have a two-way conversation with your data store, and operationalize what you analyze

Governance, Risk & Compliance

Handle an increasing complex GRC landscape with a powerful and agile new generation data platform

Mainframe to NoSQL

Leapfrog RDBMS and enable operational big data applications with MarkLogic Enterprise NoSQL and Intel integrated data center technology

New Generation Data Warehouse

Easily handle all your data types, in real time, with new generation data warehouse solutions powered by MarkLogic

Operational Data Hub

Evolve beyond SOA and Data Warehouses with a real-time Operational Data Hub that enables cross-system data governance, discovery, analysis, and real-time system of record capability

Suspicious Activity Monitoring

Get a more complete, real-time view of behavior, activities and other changing information so you can catch the bad guys before they strike
